

Table1**Drugs causing hearing loss as a side effect**

US National Library of Medicine
National Institutes of Health

Drug category	Class of drug	Subclass of drug	Examples
Anti infective	Antibiotics	Aminoglycosides	Neomycin, gentamicin, amikacin, netilmicin
		Macrolides	Erythromycin, azithromycin, clarithromycin
		Quinolones	Ofloxacin, ciprofloxacin, levofloxacin
		Tetracyclines, vancomycin, teicoplanin, framycetin, colistin, imipenem with cilastin	
	Others		
Analgesics	Antivirals		Ganciclovir, zalcitabine, ribavirin + interferon
	Antifungals		Amphotericin, flucytosine
	Antimalarials		Chloroquine, mefloquine, quinine
	Antituberculous		Capreomycin
	Non steroidal		Aspirin, indomethacin, ibuprofen, diclofenac,
Anticancer drugs	Anti-inflammatory		Ketorolac, sulindac, naproxen,
	Cytotoxics	Platinum compounds	Cisplatin, carboplatin, oxaloplatin
		Vinca alkaloids	Vindesine, vinblastine, vincristine
		Others	Bexarotene, taxane
		Loop diuretics	Furosemide, bumetanide, torasemide
Cardiac and vascular drugs	Diuretics	Carbonic anhydrase inhibitor	Acetazolamide
	Beta blockers		Metoprolol, sotalol, practolol, bisoprolol
	ACE inhibitor		Ramipril
Neurologic drugs	Anticonvulsant		Sodium valproate
	Anti-Parkinson's		Entacapone
Others	Immunosuppressant		Tacrolimus
	Antirheumatoid		Hydroxychloroquine
	Local anaesthetics		Ropivacaine
